Professional Summary

Frontend Engineer with 3+ years of experience building web and mobile products across fintech, telecom, food delivery, and crypto, using TypeScript, Next.js, React, and React Native. Currently building a lending platform with peer-to-peer loans and a multi-role captive portal at East Atlantics, working directly with stakeholders and users to turn requirements into shipped features. Experienced in secure authentication, payment integrations, role-based dashboards, real-time features, and performance-focused state management.

Experience

East Atlantic Telecoms | Lagos, Nigeria
Frontend Engineer | 09/2025 - Present
East Atlantics is a telecom company. I work on two of its core products: a fintech lending platform and an internet services platform.

Fintech Lending Platform (mobile and web)

- Built the core mobile (React Native) and web fintech app with TypeScript, including peer-to-peer (P2P) lending features.
- Implemented secure token management and session timeout handling to protect user accounts.
- Built the notification system, delivering both in-app and push notifications for account and loan activity.

Internet As A Service

- Built the frontend from scratch, covering a customer-facing web app plus admin, organization, and advertiser dashboards.
- Developed analytics dashboards with financial metrics, charts, active WiFi sessions, top-performing services, and payment management etc.
- Implemented role-based access control across four user types, so each sees only the features and data meant for them.
- Set up a reusable component library and a scalable data fetching and state management architecture for fast, consistent interfaces across the dashboards.
- Work directly with stakeholders and users to gather requirements, prioritize features, and deliver improvements to the captive portal.

SwapSpace | London Area, United Kingdom
Frontend Engineer | 04/2025 - 11/2025
Swap-Space is an invite-only home exchange platform that helps people travel affordably by swapping homes with verified members across the UK, US, and Europe. The MVP launched and onboarded 100 founding members in its first month, with 45% listing their homes on the platform.

- Built the webapp of the MVP with Next.js and TailwindCSS, using RTK Query for data fetching and state management.
- Created reusable UI components, including the property card, to keep the interface consistent across the platform.
- Developed search and filtering for property listings.
  Built a real-time chat feature for swappers using WebSockets.
- Implemented image upload for the property listing flow.
- Handled form validation with Formik and Yup.
- Created the swap credit animation and other interface animations with Framer Motion.
- Ensured mobile responsiveness and cross-browser support.

FoodEx | Lagos, Nigeria
Front End Developer | 02/2025 - 09/2025
FoodEx is a food ordering and delivery platform that connects customers with local vendors and streamlines restaurant operations.

- Built MVPs of the customer web app, landing page, admin dashboard, and vendor dashboard with React and Vite in an NX monorepo.
- Built responsive UIs with TailwindCSS across devices.
- Integrated Paystack, Direct Debit, and Payment Links for secure checkout.
- Improved checkout reliability with React Hook Form + Zod validation and managed server state with RTK Query.
- Developed real-time order tracking using WebSockets.

- Wrote unit tests (Jest, React Testing Library) and end-to-end tests (Playwright); contributed to the GitHub Actions CI/CD pipeline and used AWS Secrets Manager for secure configuration.

NerdwareX | Lagos, Lagos
Front End Developer | 03/2023 - 09/2024
NerdwareX is a first of its kind crypto payment-based online learning platform which helps to further improve security, reduce the risk of funds loss, and more.

- Worked jointly with both the Backend and Blockchain Team to implement the functionality for users to connect a crypto wallet their NerdwareX account, resulting in improved security and reduced risk of funds loss.
- Worked closely with the Frontend Team to identify and fix major and minor bugs, ensuring the smooth operation of the platform.
- Contributed to the ongoing development of the product by implementing new features and improving existing ones.

AltSchoolAfrica School of Software Engineering | Lagos, Lagos
Front End Developer | 04/2022 - 06/2023
AltSchoolAfrica is a school for individuals looking to gain technical skills to kick-start a career in Software Engineering and earn a Diploma in highly-sought after tech skills.

- Worked in a team to build a Telecom Carrier Identifier feature for a web app, improving its functionality and user experience.
- Managed the team's repository, handling version control and reviewing and merging pull requests.
- Collaborated with the product design team to make sure the app met user needs and delivered a smooth experience.

HNG Internship | Lagos, Lagos
Front End Developer | 09/2022 - 11/2022
HNG Internship is a large scale, fast-paced virtual internship for people learning code, design, project management and technical sales/marketing.

- Collaborated with a cross-functional team of product managers, product designers, and software developers to build a sales web app product.
- Developing key pages of the web app, which helped increase user traffic by 34%.
- Assisted in resolving merge conflicts that occurred in the team's repository, helping to ensure that code was merged correctly and on time.

Tools

- **Core Languages**: JavaScript, TypeScript, Python
- **Frameworks/Tools:** ReactJS, React Native, NextJS, NodeJs,PostgresSQL, TailwindCSS.
- **Deployment/Version control**: Git, GitHub, AWS.

Skills

- **Languages:** TypeScript, JavaScript, Python
- **Frontend:** React, Next.js, React Native, TailwindCSS, ShadCN, Framer Motion
- **State and data:** RTK Query, Redux Toolkit, Zustand, Tanstack Query
- **Testing:** Jest, Vitest, React Testing Library, Playwright, Cypress
- **Security:** OAuth, JWT
- **Tools and Cloud:** Git, GitHub Actions, AWS, NX, Vite, Webpack, Node.js, PostgreSQL, Firebase, Supabase
